THE SEARCH FOR OUR COSMIC ANCESTRY
by Chandra Wickramasinghe
(Buckingham Centre for Astrobiology, UK)

“The author is today’s foremost expert on panspermia, having inherited that mantle from the iconic astronomer of the 20th century Sir Fred Hoyle who, with Wickramasinghe as his pupil, strongly re-introduced the subject in the early 1970’s. He makes a compelling case for panspermia conveying a cosmic imperative for biology.”
Gilbert V Levin
Principal Investigator of NASA’s Mars Viking Mission of 1976
Discoverer of evidence for Microbial Life on Mars
Arizona State University

“The book is accessible to those interested in an appreciation of a central question that spans all ages, and scientists and science students, who are seeking coverage of this pioneering subject matter. The historical approach to the subject will be appreciated by readers. The book will take you on an intellectual trek and can transform how you think about humans and the universe. Hopefully it will encourage the next generation of scholars to continue seeking an understanding of the origin of life, one of the most profound challenges for humanity.”
Professor J T Trevors
University of Guelph, Canada

WHERE DID WE COME FROM?
Life of an Astrobiologist
by Chandra Wickramasinghe (Buckingham Center for Astrobiology, University of Buckingham, UK & University of Peradeniya, Sri Lanka)
edited by Kamala Wickramasinghe

The life story of this book spans many stages of the life and scientific career of one of the foremost astrophysicists/astrobologists of our times. Starting from his boyhood days, the book describes the author’s scientific work over the past 50 years, the ground-breaking discoveries he had made, the controversies generated in the scientific community, and the gradual acceptance of his discoveries. Written in lucid non-technical language it captures the essence of the author’s research at Cambridge, his lifelong collaborations with the legendary astronomer of the 20th century, Sir Fred Hoyle, the birth of the subject of astrobiology which they arguably “invented” in 1980, and his continuing ground-breaking research carried out while he was a Professor at Cardiff and later at Buckingham. The book traces the various influences that guided the author through his career, including that of his father who was a Cambridge Wrangler, and the profound influence of Buddhism in his early life.

Contents: Prologue; To Begin at the Beginning; Through the Mists of Time; Sail Away on SS Scynthia; From School to University; Destination Cambridge; A Project Takes Shape; Grinding Out the Details; Launching the Carbon Dust Theory; The Data Leads the Way; From Cambridge to Cardiff; and other chapters

World Scientific proudly presents books by Chandra Wickramasinghe
A JOURNEY WITH FRED HOYLE
Second Edition
by Chandra Wickramasinghe
(University of Buckingham, UK)
edited by Kamala Wickramasinghe

Reviews of the First Edition:
“This is the story of the remarkable 40-year friendship and scientific collaboration between the British astrophysicist Fred Hoyle and the Sri Lankan mathematician and astronomer Chandra Wickramasinghe ... The work they are most famous for is their painstaking building of the case for a cosmic origin of life. Wickramasinghe and Hoyle’s picture of a galaxy teeming with life is a stunning one ... The scientific community has come a long way towards Hoyle and Wickramasinghe’s position, wholeheartedly embracing the idea of planetary panspermia.”

New Scientist

“The Hoyle-Wickramasinghe collaboration was notable for the daring leaps over knowledge gaps they were prepared to make. This book is a valuable guide to their corpus, and can serve as a source of ideas and speculations.”

International Journal of Astrobiology

ORDER FORM
Please complete the form and send it to any of our offices below or order online @ www.worldscientific.com. Alternatively, you can send your order directly to your regular book supplier.
